Career Objective

Aspiring Full Stack Java Developer with hands-on experience building end-to-end web applications using **Java, Spring Boot, JDBC, Hibernate, and MySQL**, complemented by strong front-end skills in **React, JavaScript, and Tailwind CSS**. Skilled in **MVC architecture** and secure authentication, with practical exposure gained through a Full Stack Developer internship at TAP Academy and self-driven full-stack projects, and looking to apply a solid problem-solving foundation and full-stack development skills to a growth-oriented engineering team.

Skills

Programming: Java, JavaScript
Frontend: HTML5, CSS3, JavaScript, Tailwind CSS, React
Backend: Spring, Spring Boot, JDBC, JSP/Servlets
Database: MySQL
Core: Object-Oriented Programming (OOPs)

Projects

Hungrify – Food Delivery Web Application Jul 2026 – Aug 2026

Java, JDBC, Servlets, JSP, MySQL, HTML5, CSS3, JavaScript, Git, GitHub, MVC Architecture [🔗 Repo](#)

- Engineered **Hungrify**, a full-stack food delivery web application supporting **15+** restaurant listings, with user authentication, menu browsing, shopping cart, and order management.
- Built responsive and modern user interfaces using **HTML, CSS, JavaScript, and JSP** across **10+** dynamic pages, ensuring a smooth user experience across devices.
- Integrated secure user authentication with **BCrypt** password hashing and session-based login management for **2** user roles (customer and admin).
- Implemented dynamic features such as restaurant-wise menu loading, quantity management, cart operations, and real-time price calculation.
- Streamlined backend functionality using **Java Servlets, JDBC, and MySQL** across **6+** relational tables, following the **MVC** architecture.

Libaas – E-Commerce Web Application Aug 2026 – Sep 2026

Java, Spring Boot, Hibernate, MySQL, REST API, HTML5, CSS3, JavaScript, Git, GitHub [🔗 Repo](#)

- Built a full-stack e-commerce web application handling a catalog of **50+** products, with secure user authentication, product management, shopping cart, wishlist, and order processing.
- Designed a layered architecture across **4+** layers (controller, service, repository, entity) following industry best practices to improve maintainability.
- Optimized database interactions using **Hibernate** relationships, lazy/eager loading strategies, and transaction management.
- Delivered dynamic features including product search, category filtering, order history, inventory management, and checkout workflow.

Experience

Full Stack Developer Intern – TAP Academy Feb 2026 – Sep 2026

- Built and maintained full-stack web applications across **3+** project modules using **Java, JDBC, Servlets, JSP, Hibernate, Spring Boot, HTML, CSS, JavaScript, and MySQL**.
- Structured **5+** backend modules following the **MVC** architecture, ensuring clean, modular, and maintainable code.
- Implemented CRUD functionalities across **4+** core modules and integrated **MySQL** databases using JDBC for efficient data management.
- Collaborated with mentors to debug applications, resolving **10+** bugs and improving application performance.

Achievements

- Successfully completed the **100 Days Coding Challenge** at TAP Academy, strengthening problem-solving skills and Java programming fundamentals.
- Completed a **Java Full Stack Developer Internship** at TAP Academy with hands-on experience in full-stack web application development.

Education

Bachelor of Computer Application – Dr. Ambedkar Memorial Institute of Information Technology & Management Science, Rourkela, Odisha 2022 – 2025
CGPA: 7.2
