Career Objective

Full Stack Java Developer with hands-on experience building web applications using **Java, Spring Boot, JDBC, Hibernate, and MySQL**, along with front-end skills in **React, JavaScript, and Tailwind CSS**. Familiar with **MVC architecture** and secure authentication, with practical experience gained through a Full Stack Developer internship at TAP Academy and independent full-stack projects.

Skills

Programming:	Java, JavaScript
Frontend:	HTML5, CSS3, JavaScript, Tailwind CSS, React
Backend:	Spring, Spring Boot, Hibernate, JDBC, JSP, Servlets
Database:	MySQL
Tools:	Git, GitHub, Eclipse, Postman
Core:	Object-Oriented Programming (OOP), MVC Architecture, Problem Solving

Experience

Full Stack Developer Intern – TAP Academy *Feb 2026 – Sep 2026*

- Maintained and extended full-stack web applications across **3+** project modules using **Java, JDBC, Servlets, JSP, Hibernate, Spring Boot, HTML, CSS, JavaScript, and MySQL**.
- Integrated backend components following the **MVC architecture**, including Servlets, model classes, and DAO components to organize request handling and database access.
- Implemented **CRUD operations** and integrated MySQL database operations using JDBC for data retrieval, insertion, updating, and deletion.
- Worked on Spring Boot project functionality and debugged application issues in collaboration with mentors.

Projects

Wearora – E-Commerce Web Application **GitHub**

Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, React.js, Vite

- Developed a full-stack e-commerce application using **React.js** and **Spring Boot**, enabling product browsing, variant selection, cart and wishlist management, cash-on-delivery checkout, and order tracking through **REST APIs**.
- Implemented **JWT-based authentication** with **Spring Security** to authenticate users, protect REST API endpoints, and restrict access to authorized resources.
- Built order management functionality with **server-side validation** and database persistence, enabling reliable order placement, customer-specific order access, and order status tracking.

Hungrify – Food Delivery Web Application **GitHub**

Java, JDBC, Servlets, JSP, MySQL, HTML5, CSS3, JavaScript, Git, GitHub

- Created **Hungrify**, a food delivery web application supporting **15+** restaurant listings, with menu browsing, shopping cart, and order management.
- Implemented **customer authentication** with BCrypt password hashing and session management to support secure login and logout functionality.
- Built dynamic restaurant-specific menus, cart quantity updates, and database-driven price calculations to provide a seamless food ordering experience.

Achievements

- Successfully completed the **100 Days Challenge** on TAP Academy's **TAI Platform**, demonstrating consistent dedication to daily practice and continuous improvement in programming, aptitude, problem-solving, and technical skills.

Education

Bachelor of Computer Application – Dr. Ambedkar Memorial Institute of Information Technology & Management Science, Rourkela, Odisha *2022 – 2025*

CGPA: 7.3
