Professional Summary

Java Full Stack Developer with hands-on experience building web applications using **Java, Spring Boot, REST APIs, Hibernate/JPA, and MySQL**, alongside frontend development with **React.js and JavaScript**. Experienced in developing CRUD operations, authentication features, and database-driven functionality through full-stack projects and internship experience. Focused on writing maintainable code and building reliable, user-friendly software solutions.

Skills

Programming:	Java, JavaScript
Frontend:	HTML5, CSS3, React.js, Tailwind CSS
Backend:	Spring Boot, Hibernate, Spring Data JPA, JDBC, Servlets, JSP, REST APIs
Database:	MySQL
Tools:	Git, GitHub, Eclipse, Postman
Core Concepts:	Object-Oriented Programming (OOP), MVC Architecture, Problem Solving

Projects

Wearora – Full-Stack E-Commerce Web Application *Aug 2026 – Sep 2026*
Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, React.js, Vite Repo

- Developed a full-stack e-commerce application using **React.js** and **Spring Boot**, featuring product browsing, product variants, cart and wishlist management, and cash-on-delivery checkout.
- Implemented **JWT-based authentication** using **Spring Security** to authenticate users and secure protected REST API endpoints.
- Implemented order management with **backend validation**, database persistence, and customer order status.

Hungrify – Food Delivery Web Application *Jul 2026 – Aug 2026*
Java, JDBC, Servlets, JSP, MySQL, HTML5, CSS3, JavaScript, Git, GitHub Repo

- Developed **Hungrify**, a food delivery web application featuring 15+ restaurant listings, menu browsing, shopping cart functionality, and order management using Java, Servlets, JSP, and MySQL.
- Implemented **customer authentication** with BCrypt password hashing and session management to support secure login and logout functionality.
- Built dynamic restaurant-specific menus, cart quantity updates, and database-driven price calculations to provide a seamless food ordering experience.

Experience

Full Stack Developer Intern – TAP Academy *Feb 2026 – Sep 2026*

- Developed web application modules using **Java, JDBC, Servlets, JSP, Spring Boot, Hibernate, and MySQL** for backend functionality and database operations.
- Implemented backend components following the **MVC architecture**, including Servlets, model classes, and DAO components to organize request handling and database access.
- Implemented **CRUD operations** and integrated MySQL database operations using JDBC for data retrieval, insertion, updating, and deletion.
- Worked on Spring Boot project functionality and debugged application issues in collaboration with mentors.

Achievements

- Successfully completed the **100 Days Challenge** on TAP Academy's **TAI Platform**, demonstrating consistent dedication to daily practice and continuous improvement in programming, aptitude, problem-solving, and technical skills.

Education

Bachelor of Computer Application – Dr. Ambedkar Memorial Institute of Information Technology & Management Science, Rourkela, Odisha *2022 – 2025*

CGPA: 7.3
